

Mission Statement
IEP Tidal Wetlands Monitoring Project Work Team

The IEP Tidal Wetland Project Work Team will collaborate in the design of monitoring programs for fish and foodweb resources in restored tidal wetlands in the Bay Delta system. Specific goals of the PWT will be to:

- 1) Lead and support the development of a system-wide biological monitoring program for fish and foodweb resources in restored wetlands,
- 2) Participate in the development of site-specific biological monitoring plans for tidal wetland projects concurrent with implementation planning,
- 3) Provide guidance and review of tidal wetland research and monitoring proposals.

Team members will include all interested agencies and stakeholders. The team will meet approximately monthly.
